RACE PROVEN RINGS

ANY SET• WAS \$139.95 • NOW \$69.95

Built to be compatible with full output high horsepower engines with any compression ratio at sustained high RPM. Top and second rings are select "high strength" metallurgically stable ductile iron or steel, yielding maximum tensile strength of 80,000 psi. Fully resistant to wear and scuffing with chrome plating that is lapped in a secondary procedure for instant break-in and immediate performance output.

With compression ratios of 11.1 and higher, hypereutectic pistons run exceedingly hot and require extra clearance on ring width as well as end gap to keep the rings from seizing. "H" type ring sets are engineered and manufactured to carry these extra clearances. Designed for high horsepower engines with any compression ratio at sustained high rpm . Chrome plating that is lapped for instant break-in and immediate performance.
